**c. 3500 BC:**  
Early settlers in the Nile valley

**c. 3100 BC:**  
Development of hieroglyphs

**c. 2700 BC:** First stone pyramid built.

**c. 2600 BC:**  
Pyramid of Giza built.

**c. AD 300:** Last use of hieroglyphic writing.

**1922:** Howard Carter discovers the **tomb** of Tutankhamun.

Story of Britain	Society and Government	Economy and Trade	Beliefs	Vocab					
<p>Ancient Egyptians were one of the most advanced Ancient Civilisations – they were using metals and more advanced technologies while Britain was still in the Stone Age.</p> <p>Ancient Egypt began to emerge as a settled society around 3100BC – over 2000 years before the Celts started settling into tribes in Britain.</p> <p>Egyptian was one of the first languages to be written down. Hieroglyphs were used until approx. 300AD. Historians only began to understand hieroglyphs after the discovery of the Rosetta Stone.</p> <p>In 1922 a team of British Archaeologists led by Howard Carter discovered the tomb of Tutankhamun – ‘the Boy King’ – who became Pharaoh age 9 and died aged 18. His tomb in the Valley of the Kings is the only known tomb that hadn’t been robbed of all its treasures. The discovery of the tomb was very important in understanding more about life in Ancient Egypt.</p>	<p>Egyptian society was strictly hierarchical - at least 5 layers: The Pharaohs; Viziers; Scribes; Farmers; Slaves.</p> <p>Pharaohs were seen as the representative of the gods on earth – half god/half man. They had absolute power. The first pyramids were built in 2700BC – they were tombs for the Pharaohs and their families.</p> <p>Cleopatra was the last of the Pharaohs but had to fight to stay as Pharaoh because she was a woman. When the Romans came, she made an alliance with Julius Caesar and persuaded him to defeat her brother Ptolemy.</p> <p>Cleopatra and Caesar had a son together. Cleopatra made Egypt wealthy again and built-up trade with other nations.</p> <p>When Cleopatra died, Egypt became part of the Roman empire. Egyptians now had to work for Rome – the crops grown in the Nile delta kept Romans fed.</p>	<p>The Nile was central to Egyptian life as it provided fertile land and water for the Ancient Egyptians. The way the Nile floods made the land around it very good for growing crops which enabled the Egyptians to develop a lot of wealth.</p> <p>The mud around the Nile made very good bricks which helped with building.</p>	<p>Religion was very important to the Egyptians. Like (but before) the Romans, they were polytheists – they worshipped many gods.</p> <p>The most important gods included Ra (Sun God), Osiris (God of Life and Death) and Anubis (God of the Dead).</p> <p>Ancient Egyptians thought that if they pleased the Gods that they would be granted eternal life. They believed in Ma’at (May-et)– a life of justice, order and harmony. They believed that all levels of society would be judged as equal. A slave would be treated the same as a pharaoh and would be rewarded or punished based on their behaviour.</p> <p>Death rituals and mummification were important to the Egyptians as this prepared the person for the journey to the afterlife.</p> <p>Egyptians made many advances in medicine. Egyptian doctors were seen as priests because illnesses were seen as a punishment from the gods.</p>	Tier One	<p>Ancient, Long time ago, Before, After, First, Equator, Civilisation, Era, Tropic of Cancer, Located</p> <p>Sumerian, Egyptian, Indus Valley, Ancient Greek, Shang Dynasty (Ancient China) / Rome, Inca, Aztec</p> <p>Hierarchy</p>	Tier Two	<p>Society</p> <p>Hierarchy (hierarchical)</p> <p>Pharaoh</p> <p>Vizier</p> <p>Scribe</p> <p>Artisan</p> <p>Slave</p> <p>Government</p> <p>Order</p> <p>nisation)</p>	Tier Three	<p>Resurrection</p> <p>Mummification</p> <p>Preservation (preserving)</p> <p>Afterlife</p> <p>Sarcophagus</p> <p>Canopic jar</p> <p>Tomb</p> <p>Afterlife</p>
